

Anagram

Spring

The season of spring has finally come! We can see many **buds** (花蕾) which will bloom into flowers. There are animals too, like rabbits and frogs, and insects such as bees and butterflies. There is also much **rainfall** (下雨), but usually there's a rainbow when the sky clears up.

IN an **anagram** (重排字母), you have to **re-arrange** (排列) the letters to make a word. Can you do it for each word on the left, and then **match** (配對) it with the English explanation (解釋) on the right?

Answers

1. butterfly - an insect with wings
2. rabbit - an animal with long ears
