## What is a sea lion?

Sea lions are sea mammals. They are different to fish because they can live on land. There are many of them at Ocean Park in Hong Kong. They are clever animals. They learn very fast. They eat small fish. They love music.

## What does a sea lion have?

### Moustache

A sea lion has a huge **moustache**, which helps it to detect things.

### Eyes

A sea lion's eyes are very **powerful**. They are highly **sensitive** to light and help with hunting. Stevie can play **hide-and-seek** very well.

### Earflaps

This is what makes sea lions different to seals. Earflaps also help with hearing because they can block out noise.

### Mouth

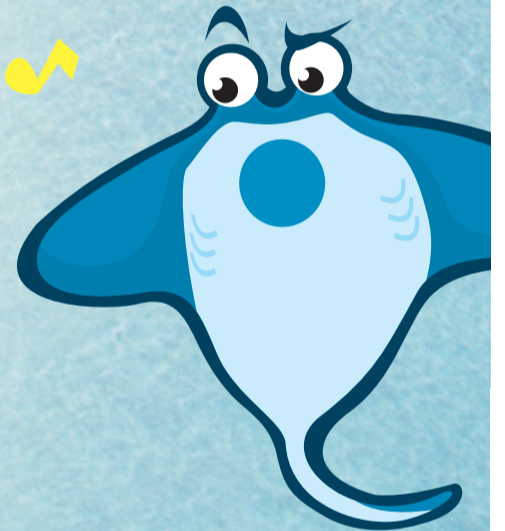

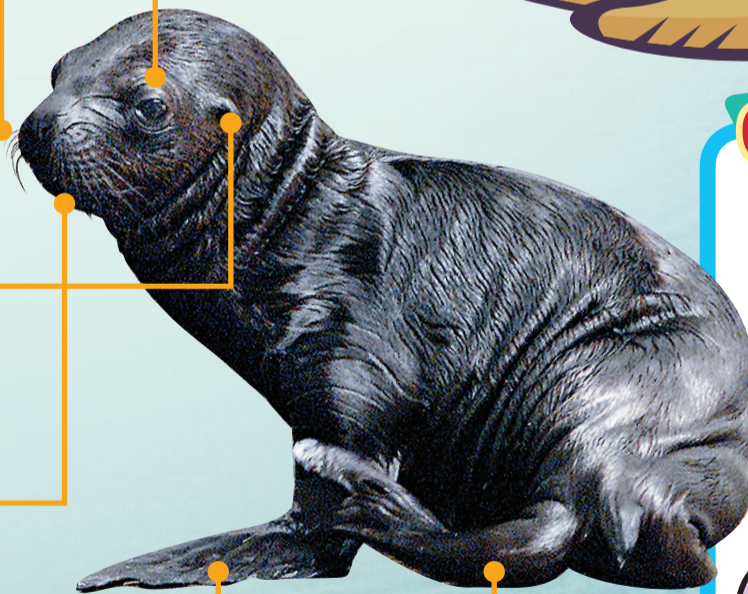

A sea lion has a big mouth and a strong jaw. It can **crush** almost anything.

### Flippers

Thick flippers help with swimming and **steering** under the sea.

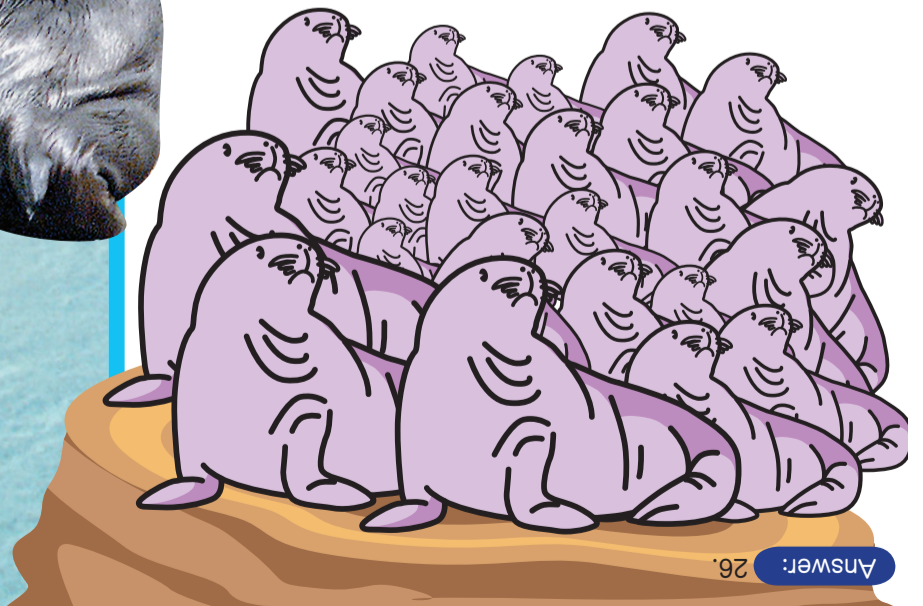

### Tail

A big tail helps it swim fast. It can push the water behind it to increase its speed.

## Game

How many sea lions are there in the picture below?

Answer: 26
